## CLEVER CLEANING

### R20 SERIES

Two models R20 & R20T

#### **R20 – Multi-purpose, compact and light**

A small, compact machine, 20cm brush cleaning width that is able to reach into areas many other cleaning machines can not. The single stick handle with press button that controls the amount of solution gravity fed onto the brushes, is light and easy to use. The R20 is particularly ideal for domestic households, regular hotel room maintenance, building maintenance cleaning, bathrooms and toilets and changing rooms with cubicles. It is light to transport and with a detachable handle it easily fits into the boot of most small cars.

#### **Technical Specification**

Single-phase induction motor,	
various ratings available eg 230V 50Hz	400w
brush speed	650rpm
cleaning width	200mm
clean water capacity	1 litre
solution distribution method	gravity feed

weight	20.5 kg
length	366mm
width	303mm
clearance height	205mm
coverage – hard floors	200m_/h
coverage – carpets	60m_/h

R20

#### **R20T – Multi-purpose, compact and light**

The R20T has all the features of the R20 plus an additional 3litre clean water tank. The amount of solution gravity fed onto the brushes, is easy to use and control. Like the R20 the R20T is also ideal for domestic households, regular hotel room maintenance, building maintenance cleaning, bathrooms and toilets and changing rooms with cubicles. It is light to transport and with a detachable handle it easily fits into the boot of most small cars.
