R45 SERIES

Three models R45S, R45B & R45Esc

R45S - Multi-purpose and economical

The R45S twin cylindrical brush machine with ergonomic control handle and 7litre water tank, is ideal where a high quality and hygienic result are required. The R45S is suitable for cleaning all floor surfaces including safety flooring and carpets, leaving the floors dry within minutes. The R45S is ideally suited for medium sized areas such as kitchens, schools, and care homes.

R45Esc – Escalator and Travelator Cleaner

The R45Esc has all the features of the R45B and by using a special brush with stepped bristles can clean escalators and travelators as well as doing all the tasks that the R45B does so well. The R45Esc cleans deep into the escalator/travelator grooves, using minimal amounts of water.

A typical escalator can be quickly, maintained in around 20 minutes. The operator simply stands holding the machine in position with the escalator/travelator moving towards the machine washing, scrubbing and collecting the dirt. With a little extra time heavily soiled escalators can be brought back to their best, leaving steps dry in minutes, no damage to the aluminum treads and presenting no safety hazard to electrical components.
